Relevant Experience

Full Stack Developer • **Turgajo Technologies** (Feb 2024 – Present)

- Build, style, and ship high quality ERP application, design systems, mobile apps, and cross-platform digital experiences for a diverse array of clients using technologies such as C#, .Net Core, Blazor, Telerik, and more.
- Lead the development and architecture of in-house tools like timesheet management system, REST APIs, and continuous integration pipelines to fulfil business requirement.
- Work alongside product & project managers, business analysts, and other engineers to transform creative concepts into refined digital experiences at an agile (2 week) cadence.
- Improved developer workflows by linking Git commits to JIRA tickets, streamlining timelines, and standardizing team practices.

Sr. Software Engineer • **Tech Mahindra** (Aug 2022 – Sep 2023)

- Engineered and enhanced key features of Applied Materials' internal web application used by factories and labs, leveraging Angular, Node, TypeScript, and Telerik.
- Proposed and implemented scalable solutions to issues identified with cloud services and user-facing applications responsible for communicating with the Applied Materials internal application AMAT Home.
- Collaborated with other developers to ensure thoughtful and consistent user experiences across AMAT Home internal applications.

Systems Engineer • **Tata Consultancy Services** (Sep 2020 – Aug 2022)

Asst. Systems Engineer (Aug 2019 – Sep 2020)

- Developed, maintained, and shipped production code for client Bank of America websites primarily using C#, .Net Framework, AJAX, and more.
- Used .Net Core 5 to implement containerization of applications that used the client internal framework and support the framework related dependencies.
- Supported efforts to modernize the way applications were built and deployed, contributing to a more streamlined and adaptable technology environment.

Education

Mumbai University

Bachelor of Engineering, Computer Science (Sep 2020 – Aug 2022)

Skills

Programming Languages

C#, JavaScript, TypeScript, Python, SQL, HTML, CSS

Frameworks and Libraries

.NET Core (MVC, Web API), Blazor, Node.js, Angular 14, Telerik UI

Tools and Databases

Git, Bitbucket, JIRA, IIS, Jenkins, MySQL, PostgreSQL, MongoDB

Projects

Timesheet Management

Designed and developed a complete in-house timesheet management system in MVC C#, enabling employees to log hours, assign tasks, and track progress.

Mobile Office Manager (MOM)

Built a modern ERP system for elevator companies using .NET Core, Blazor, and microservices, inspired by a legacy .NET Framework system.

prashilshah.github.io (v1)

Personal website built from scratch using only HTML, CSS and JS, without any external libraries or frameworks.

Languages

English (Full Proficiency)

Hindi (Full Proficiency)

German (Intermediate Proficiency)

Interests

Swimming, gym, travelling, PC games, cooking, baking, reading
